

Ryan Falcone

Professional Experience and Responsibilities

Ryan Falcone is an impactful change agent who enjoys helping clients apply transformational solutions to their strategic and IT challenges. He has over 16 years of demonstrated experience leading complex organizational change designed to align business capabilities with the optimized delivery of IT resources and services.

He has a diverse experiential background that includes enterprise business architecture, disaster recovery, cloud computing, virtualization, project management, corporate governance, audit, training, and information technology. As a Senior Technical Engineer and Project Manager, Ryan has helped implement business continuity, disaster recovery, and crisis management programs at several of the Twin Cities most prominent Fortune 500 companies. Ryan is exceptionally skilled at quantitative analysis, and highly skilled at communicating across all levels of an organization, including the senior executive level.

Ryan holds three Masters Degrees (including an M.B.A.) and is in the final stages of completing a Ph. D in Organizational Behavior. He also holds several professional certifications, including VMware VSP4, professional human resources management and is certified as a Business Continuity Professional.
