

Shawn Sarazin

Professional Experience and Responsibilities

Shawn Sarazin is a Senior Technical Architect assisting clients in developing data center strategies, planning and executing data center relocations, and identifying data center energy efficiency opportunities. His innovative solutions reduce data center costs and help clients achieve their business goals.

With comprehensive knowledge of the data center, from floor-plan design, mechanical and cooling systems, as well as IT infrastructure, Shawn understands the impact of changes on the applications that drive business. By guiding clients through discovery, analysis, and implementation, he helps ensure data center reliability, flexibility and scalability, to allow for maximum application availability to the business.

Shawn has a Bachelor of Applied Science, Teaching Secondary Math and an Applied Minor in Computer Science from the University of Minnesota, Duluth.

Professional Associations

Shawn is ITIL Foundations certified.

Project Experience

Medica, Allianz Life Insurance, University of Minnesota, Medtronic, 3M, Deluxe Corporation, Bremer Bank, Marshfield Clinic, Scottrade, Nationwide Insurance, and Cedars-Sinai Medical Center
